### Certified Backflow Prevention Device Testers

Public water systems must ensure that each backflow prevention assembly is tested by a person with valid certification from a certifying organization recognized by the State Water Board. The County of Santa Cruz Health Services Agency, Environmental Health Division maintains this list as a reference and does not recommend any specific companies on this list over any other company, listed or unlisted. **It is the responsibility of any water system using this list to verify the qualifications and experience of an individual or company before hiring them.**
